Understanding Participation rates in post-16 Mathematics and Physics (UPMAP)

Protocol for the Questionnaire Administration

It is important that the statement below is read to the students before they begin the questionnaire.

Dear Students,

This questionnaire is part of a national project to find out why some students study mathematics or physics after the age of 16, and others do not.

Your answers are going to be used for research purposes only. Neither your school, nor your teachers, nor anyone else outside the researchers who are working on this project will see your individual answers.

We are asking everyone for their names in order to see how your views have changed from your original responses.

We think the questionnaire will take you about 30 to 45 minutes to complete.

Thank you very much for taking part in this important project.
